+1 (407) 923-7659 | sal15414@ucf.edu | [linkedin.com/in/sami-msa](https://www.linkedin.com/in/sami-msa) | github.com/samiahmed14

EXPERIENCE

Dhaaps Edutech

Hyderabad, TG

Data Science Intern

05/2023 - 06/2023

- Designed a machine learning-based solution to improve loan approval accuracy by 20%.
- Utilized Python for data analytics during a month-long internship, showcasing punctuality and problem-solving.
- Automated data processing tasks using Python, boosting efficiency in educational tools.

SEO Content AI

Los Angeles, CA

Machine Learning Engineer Intern

04/2023 - 12/2023

- Expanded global audience reach by integrating multi-language support via Google Translate API.
- Developed a Python and JavaScript Chrome extension, improving content quality and speed by 40%.
- Led the integration of transformer models in AWS microservices, enhancing AI-driven content generation by 25%.
- Deployed scalable applications using Docker, AWS ECS, and Fargate for reliable cloud-based solutions.
- Implemented agile methodologies to improve team collaboration and streamline project management.
- Enhanced content quality with BERT, RoBERTa, and DistilBERT for grammar correction, improving user trust.

PROJECTS

Chronic Kidney Disease Predictor (MERN Stack|Random Forest|Flask|MongoDB|Python, XGBoost)

[\[Link\]](#)

- Developed logistic regression model using Scikit-learn achieving 98% F1 score for kidney disease prediction.
- Architected full-stack MERN application with Flask backend, creating intuitive clinical interface for healthcare professionals.
- Implemented MongoDB storage for secure patient data management, enabling scalable healthcare data workflows.

NutriPedia (TensorFlow, Inception-V3, GCP Storage, OpenAI GPT-3.5 API, SQL, MERN Stack)

[\[Link\]](#)

- Architected cloud-based nutrition platform integrating Inception-V3 CNN with GCP Storage for image processing|implementing GPT-3.5 API for personalized dietary insights from SQL nutritional database.
- Engineered full-stack data pipeline connecting computer vision classifications with NLP-powered contextual responses|creating flywheel architecture for continuous model improvement through user feedback.

Flight Fare Predictor (Random Forest, ExtraTrees, Flask, Scikit-learn, Feature Engineering)

[\[Link\]](#)

- Developed regression model using Scikit-learn and LSTM networks achieving dynamic flight price forecasting with temporal analysis.
- Engineered feature extraction pipeline with Pandas identifying key price determinants, improving model accuracy from historical data.
- Created data visualizations using Matplotlib/Seaborn for trend analysis and model performance interpretation for predictions.

Beverage Management System (YOLOv5, Streamlit, SQLite, WebRTC, Computer Vision, PyTorch)

[\[Link\]](#)

- Implemented Yolo v5 model, achieving real-time beverage detection with 98% accuracy.
- Developed a web application using Flask as the backend and Streamlit for the frontend, offering a seamless user experience.
- Leveraged PostgreSQL for database management, ensuring robust and reliable storage of inventory data.
- Incorporated Docker for deploying the application, ensuring consistency across development and production environments.

Telco Customer Churn Pipeline (Python, MLflow, XGBoost, GitHub Actions, AWS ECR/EC2)

[\[Link\]](#)

- Designed an end-to-end MLOps pipeline with modular architecture|implementing automated CI/CD workflows that reduced development time by 30%.
- Engineered scalable ETL processes and predictive analytics system using MLflow experiment tracking|achieving 15% improvement in F1-score for churn prediction.
- Developed and deployed containerized prediction API on AWS EC2/ECR through GitHub Actions|enabling robust model serving with automated testing and versioning.

SKILLS

Languages	Python, R, SQL, Java, JavaScript/ Typescript, C++, Go
Databases	PostgreSQL, MySQL, Redshift, MongoDB, Neo4j, GraphQL, Cassandra, Vector Databases
Libraries	React, TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, Django, DSPy, JAX, Langfuse
Technologies/Tools	Git, AWS, GCP, Azure, JIRA, Docker, TDD, GPU Optimization
Skills	Front-end, Back-end, Full-Stack, Data Engineering, Microservices, MLOps, LLMops
Machine Learning	Deep Learning, Natural Language Processing, Reinforcement Learning, Computer Vision

EDUCATION

MS in Statistics and Data Science , University of Central Florida (UCF) (GPA: 4.00)

08/2025 - Present

Coursework: Neural Networks, Data Science & Analytics, Software Engineering for Data Science, Applied Statistics

Bachelors in Computer Science and Engineering(Data Science),Osmania University (GPA:3.66) 07/2020 - 07/2024

Coursework: Artificial Intelligence, Machine Learning, Data Mining, Algorithms

ACHIEVEMENTS

- Advanced Certification in AI & ML – IIIT-Hyderabad

04/2025 - 11/2025
